Description

Magnolias Design is a consolidated area intended for the construction of custom villas in the Residential Resort Cumbre del Sol, with southeast orientation and exclusive views of the sea and the island of Ibiza. Several models of contemporary-style villas have been designed for the plots for sale in Magnolias Design, with a pure and elegant design, with open areas where the kitchen joins the dining room through a large central island, and this in turn connects with the porch and the terrace, uniting the interior with the exterior. This space invites you to enjoy the sun and Mediterranean climate, but oriented in such a way to ensure maximum privacy.

All models have three bedrooms and two bathrooms on the main floor, and some offer the option to expand to four bedrooms if desired, as there is an open space on the lower floor with a private porch that allows it. All include a garden and covered parking. And its open space to the outside invites you to enjoy the sun and Mediterranean climate, but oriented in such a way to ensure maximum privacy. A modern project built with qualities matching its design, offering us a unique opportunity to live in the Residential Resort Cumbre del Sol and create unforgettable memories in a dream environment where architecture and nature merge in perfect harmony.
